Dear Professor Dawkins

I do not think that
I have yet acknowledged your
letter written from the Isle
of Man re the E.A.R. matter.
I was awfully busy at the
time I remember I have been
pushing here there and
everywhere since.

I think that your
audience before the Commission
was the very thing wanted
& most valuable all
round. There is no doubt that
the matter of the Economic
value of the Survey work

and the Survey maps is the
first thing that all those
who started the Survey
had in their minds, &
certainly is the main thing
that will keep the Survey
a permanent institution.

I am perfectly sure that
the clear & straight forward
way in which you put
matters had a great influence
with the Committee from that
especial point of view.

I do not know when the
account of the summer's work
will be published. Very soon
I hope is done long ago.

Thanks for your kindly
invitation to the Sole of Man.
I am too pumped out this

year for anything. I went
down to Salop for a rest
after my work was over
Aug. 13 last. but had to come
back - too tired to rest I
suppose. I shall loaf around
at home for a while until
I can take an interest in
some thing, or another.

With all the kindest
regards to Mrs. Norton

Believe me
Ever yours sincerely
Charles Lapworth
